

I WANT TO LIVE FOR EVER

I need
A perfect woman
I need
A perfect lover
Like a dreamer's scene symbolized in a fever
Visions are so clean in a night of thunder
To reach a place in land of illusion
I should live for ever looking over
To climb the steps of the way I want to go
I should live for ever

Wild time
You sign our live
Time, time
Never satisfied why ?
Let the dreamers feel what they left behind , where?
We all have to see where's the end of a sorrow
Like the myth that flies on the angels
I want to live for ever looking over
Link some stories told in far ages
I want to live for ever

Maybe in our century we don't know
Far away from the dark space they'll come down
With the key to the problem of our time
I will live for ever

Otherwise we'll follow our poor existence
Summarised by a hole of false emotions
I a few centuries we'll never know
If we could live for ever
I want to live for ever
